

For 1,000 to 10,000 seat Organisations

Your fastest way to understanding and implementing the latest in Microsoft Endpoint Management technologies.

## INTUNE AND AUTOPILOT ACCELERATOR

- Review existing deployment & OS Build processes
- Gap & Opportunity Analysis
- Intune & Autopilot Model Office
- Model Office demonstrations
- Next Step Recommendations

## Your Accelerator

A fast, fixed price engagement to leverage the benefits of Microsoft Endpoint Management (MEM) within your environment. Reviews your current build, applications and patch management processes, identifies gaps and opportunities from a move to Intune and Autopilot, configures your model office to demonstrate the features, and gives you a recommended pathway to full production environment management.

## Removing your Challenges

All peer Organisations face the same challenges when considering a move to MEM

- Constantly moving goal posts – identifying what advances are relevant to your organisation today and for tomorrow
- Dedication of resources to monitor MEM changes and benefits
- Time and approach to create a dedicated model office for MEM
- Demonstrating technology to ensure business buy in
- Knowing how to get your organisation from Model Office to Production delivery and benefits

## An APPtechnology Accelerator engagement

- Identifies whether your requirements can be met with Intune and Autopilot (MEM)
- Identifies process improvements for your business from a move to MEM
- Reviews build, applications and patching processes
- Delivers a Model Office environment for you to trial the latest advances
- Demonstrates Intune and Autopilot configured for your environment
- Outlines the next steps needed to move to a Production environment
- During Covid restrictions these accelerator engagements can be delivered entirely offsite.
